COMPUTER STUDIES

GENERAL OBJECTIVES

The aim of the Unified Tertiary Matriculation Examination syllabus in Computer Studies is to prepare the candidates for the Board's examination. The objectives of the syllabus are designed to test candidates' understanding, knowledge and acquisition of:

- 1. Evolution of Computing Systems
- 2. Basic concepts of computer and its operations
- 3. Problem solving skills, data processing and practical skills in Computing
- 4. System software and Application Software.
- 5. Operations of Basic computer hardware Input, Output, Memory and Central Processing Unit

ponth

- 6. Application of Online resources and Online skills
- 7. Ethics and human issues in computing
- 8. Career Prospects in Computing

The syllabus is divided into nine sections as given below:

- A. Evolution of Computing
- B. Fundamentals of Computing
- C. Computer Application Packages
- D. Managing Computer Files
- E. Computer Maintenance and Safety Measures
- F. Information & Communication Technology (ICT)
- G. Developing Problem-Solving Skills
- H. Artificial Intelligence (AI) and Robotics
- I. Computer Ethics and Human Issues

DETAILED SYLLABUS

SECTION A: Evolution of Computing

TOPICS/CONTENTS/NOTES		OPICS/CONTENTS/NOTES	OBJECTIVES
1.	Hist	ory of computing	Candidates should be able to:
	-	Pre-Computing Age - 19 th century Features and components early computing devices	 i. Identify the various computing devices since the beginning of counting/computing Abacus Slide Rule
	b.	Computing Devices - 20 th Century	Napier's BonesPascal Calculator
	с.	The history behind each device	 Leibnitz Multiplier Jacquard Loom Charles Babbage's Analytical Engine Hollerith Census machine and Burrough's machine.

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 ii. Discuss the contributions and uses of each of the founders of these devices: ENIAC EDVAC UNIVAC 1 Desktop Personal Computers, etc
2. Classification of computing devices	Candidates should be able to:
a. By Generation	i. Relate each generation with its characteristic feature.
b. By Sizec. By Purpose	- First, Second, Third, Fourth to current generation.
d. By Type	 ii. Describe each generation under the following: Year of Development Basic components/Type of Technology Speed of operation Storage Capacity/Component
	iii. Explain the differences in the classification of computing systems by size (micro, mini, mainframe, and super)
et al.	iv. Differentiate among the various types of modern computer systems in respect of sizes and basic components, data and usage
15	 Personal Computers Desktops Laptops
	 Tablets Hand-held Servers
	WorkstationsMainframes
	WearableSuper Computers.
	- Digital - Analog
	- Hybrid
	 Special purpose General purpose etc.
	v. State the importance and use of these computing systems

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Overview of Computing Systems	Candidates should be able to:
 1. Overview of Computing Systems a. Two main constituents of a computer (hardware and software) b. Characteristics of computers c. Type, examples and uses of computer hardware d. Logic Circuits e. Types, examples and uses of software 	 Candidates should be able to: Define Computer system in relation to its nature and programmability List functional parts of computer systems Explain the characteristics of computers (Electronic, Accuracy, Speed, interactive, Reliability, Consistency, Large Storage etc.) Identify the differences between hardware and software Candidates should be able to: Define and give examples of hardware devices List components of computer hardware, their functions and different types -Central Processing Unit, Peripherals (Input and Output devices) and Storage media Explain the differences between input and output devices Explain the functions of major input devices and give examples of the major input devices (keyboards, mouse, scanner, joystick, light pen, voice, digital camera, etc.) Explain the flatures, functions and operations of the mouse Explain the differences among keyboard, mouse, light pen and scanner, digital camera and output devices Explain the differences among keyboard, mouse, light pen and scanner, digital camera and output devices (monitor, printer, speaker, plotters) List the different types, features and uses of each output device above. Explain the similarities and differences among inkjet, laser and line printers List the components of CPU – Arithmetic and Logic Unit (ALU), Control Unit (CU) and Registers. Xii. Explain the functions of ALU, CU and Registers. Xiii. Distinguish between Primary and Secondary Memory (ROM)) Xv. Explain the uses and differences between RAM

SECTION B: Fundamentals of Computing

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 xvi. Explain the functions of secondary (auxiliary) storages xvii. List different types of secondary storages (Floppy disks, magnetic tape, hard disks, compact disk (CD), Digital Video Disk (DVD),USB, etc.) xix. Carry out comparative analysis of auxiliary storage devices in respect of size, speed, cost and technology (access mode, component, etc.). xx. List different units by which storage are measured and their relationships - bits, bytes, nibbles, words, kilobytes, megabytes, gigabytes, terabytes etc. xxi. Relate the relationships between Micro, Mega, Giga, and Terra bytes. Candidates should be able to: Define Registers Bus Address ii. Explain the functions of the following Registers: MDR (Memory Data Register) AC (Accumulator) PC (Program Counter). CIR (Current Instruction Register), etc. iii. Explain the differences between register and main memory v. State the major steps involved in how a computer converts data to required information (Input – Process – Output) v. Enumerate factors affecting speed of data transfer (bus speed and bus width) Candidates should be able to: i. Define different type types and uses of gates: AND, NOT, OR, NOR, NAND ii. Interpret Logic equations for AND, NOT and OR gates iii. List the symbols of AND, NOT and OR gates v. Construct Truth Table for standard logic gates – AND, NOT, OR. gates

TOPICS/CONTENTS/NOTES	OBJECTIVES
	Candidates should be able to:
	i. Differentiate between system and application software.
Image: state stat	 ii. List different types of System software (Operating Systems, Utility Software, Middleware, Device Drivers, Translators, etc.) iii. Define Operating System (OS) v. List functions of OS v. List different types of OS User Interfaces (Text (Command Line and Menu) and Graphical User Interface (GUI)) vi. Give examples of Operating Systems (MS Windows, LINUX, UNIX, etc.) vii. Discuss different OS on phones, iPad (Android, Blackberry, iPhone, etc.) viii. Define Utility Software ix. List functions of Utility Software x. List different types of Utility Software x. List different categories of translator Software (Interpreter, Assembler and Compiler) xv. Explain the functions of Translator Software xiv. List the differences among the categories of translators. Candidates should be able to: i. List examples of application software and their usage ii. Differentiate between open source and proprietary software iii. Different methods of acquiring Application software (Built in house and Off the Shelf) iv. Explain the differences between User Application packages v. Give examples of common off the Shelf Application packages v. Give examples of common off the Shelf Application packages v. Give examples of common off the Shelf Application packages v. Graphics (Adobe Photoshop) Accounting (Sage) Payroll (Sage) Payroll (Sage) Payroll (Sage) Government (Remita) Banking (Fusion Banking Essence) Statistics (SPSS) Educational (SchoolShell) Hospital (eHospital), etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
2.	Data and Information	Candidates should be able to:
	a. Differences between Data and Information	i. Define data and informationii. List properties of
	b. Data representation.	information Candidates should be
	c. Methods of Digitisation	able to:
		 i. List different types of data types (integers, real numbers, strings, multimedia (image, audio/visual, signal etc.) ii. Identify ways of representing and handling data, that is number bases with special reference to binary, decimal, hexadecimal etc.
		 Candidates should be able to: Define digitization Explain the process of digitalization(manual, heads-up, interactive tracing, automatic) List different formats of digitized data (image, audio, video, motion, text, multimedia, etc.)

SECTION C: Computer Application Packages

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Word Processing package	Candidates should be able to:
	 (a) General concept (b) Creating and saving documents (c) Editing, formatting and insertion (d) Printing 	 i. Define word processing, and give examples of word processing packages. (MS Word, WordStar, WordPerfect, Open Word, etc.,) ii. Identify features of Word Processing packages in general (create, save, edit, insert, print, share etc.) iii. List the application areas of Word Processing packages (Office, Publishing, Journalism,
	(e) MS Word i. Features	Education, etc.) Candidates should be able to:
	ii. Launch MS Wordiii. Basic operations	 i. Launch effectively MS word. ii. Perform MS Word basic operations - create, edit, save, retrieve, print, copy and
	iv. Other operations	 move, etc. iii. Use different types and sizes of fonts iv. Perform MS Word operations of: v. Format, justify, search/explore, etc. Carry out spell checking and file merging operations vi. Close MS Word.

TOPICS/CONTENTS/NOTES	OBJECTIVES
2. Spreadsheet package	Candidates should be able to:
 a) General concept b) Creating and saving documents c) Editing, formatting and insertion d) Printing e) MS Excel Features Launch MS Excel Basic operations Other operations 	 i. Define Spreadsheet and give examples of Spreadsheet packages. (MS Excel, VisiCalc SuperCalc, SPSS, Calc etc.) ii. Identify features of Spreadsheet packages in general (Environment, Status bar, menu bar, formula bar, etc.) iii. List the application areas of Spreadsheet packages (Accounting, Engineering, Statistics, Calculation, what- if -scenarios, Education, etc.) Candidates should be able to: Launch effectively MS Excel. Define basic terms in MS Excel -worksheet, workbook, cells, cell ranges, etc. Use MS Excel to: create, edit, save, retrieve, and print spreadsheet documents. Use data types in MS Excel (Number, Labels, Formula etc.) v. Perform basic operations in MS excel -Data Entry, Saving, Retrieve, move, copy, etc.) vi. Use different types and sizes of fonts viii. Perform additional MS Excel operations (Formatting, Editing, Printing, Drawing charts etc.) ix. Close MS Excel.
Database package Definition of Database and examples of database packages Database organizations	 Candidates should be able to: i. Define Database and give examples of Database packages. (Dbase, Foxbase, MS Access, Oracle, etc.) ii. Define basic database terms (File, Record, Field, key, form, table, etc.) iii. List and explain different types of database
Different features of database format Basic operations of Database using MS Access	organisation (Hierarchical, Network a Relational.) iv. List the application areas of Database in different organizations (Office, Home,
Create database using MS Access Carry out operations on existing database using MS Access.	Education, Government, Hospital, Agriculture, etc.)

TOPICS/CONTENTS/NOTES	OBJECTIVES
 4. Graphics Package (a) Definitions and examples of Graphic packages (b) Features of CorelDraw (c) Simple design using CorelDraw 	 Candidates should be able to: i. Explain different features of database format in MS Access: Files designed as tables Tables comprising of rows and columns Row containing related information about a record Column containing specific type of information about a field ii. Carry out steps to create a database in MS Access to: Define structure of a database Indicate field type (numeric, character, data, text, etc.) Enter data Save data iii. carry out basic operations on an already created MS Access database: searching, modifying, sorting, reporting, selecting, inserting, etc. iv. Close the MS Access database. Candidates should be able to: Define Graphics and give examples of Graphic packages (Paint, Harvard Graphics, Photoshop, CorelDraw, Autocad etc) ii. Explain features of CorelDraw (LiveSketch Tool, Multi-Monitor, Healing Clone Tools, Copy Curve Segments, Gaussian Blur Feature, Touch-Friendly GU Interface, Powerful Stylus Enhancements, Import Legacy Workspaces, Prominent Interactive Sliders, Custom Node Shapes, Font Filtering and Search, Corel Font Manager, Enhanced Vector Previews, Handles and Node etc.) iii. Use features of CorelDraw to activate existing CorelDraw file iv. Use CorelDraw to design Business Card School Logo National Flag Invitation Card Certificates etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
5.	 Presentation Package (a) Definition of Presentation package and examples of Presentation packages (b) PowerPoint Features of PowerPoint Environment Steps in activating an existing PowerPoint 	 Candidates should be able to: i. Define Presentation and give examples of Presentation packages (MS PowerPoint, Windows Movie Maker, Micromedia Flash, impress, Apple keynotes, etc.) ii. Explain features of PowerPoint Environment (Animation Painter, Video Editor, create a video of you presentation, Automatic Ribbons Toolbars, Transitions, Sections, Cropped Tool, Mask Feature, Effective Preview, Screen Shot, Smart Guides,) iii. Explain steps in activating a PowerPoint
iii.	PowerPoint operations	 iv. Perform PowerPoint operations to: Create new presentation Insert pictures, text, graphs, animated contents, add new slide etc. Save presentation, run slide show, print presentation, close presentation etc.
6. (b)	 Web Design Package (a) Definition and examples of Web Design Packages Uses Web Design Packages 	 Candidates should be able to: i. Define and Give examples of Web design package (HTML, XML, Dreamweaver, Rapidweaver, Google Web Designer, Microsoft Sharepoint Designer, Net Object Fusion, Xara Web Designer etc.)
	(c) Elements of Web design using Dreamview	 ii. List Elements of Web Design Navigation Visual design Content Web friendly Interaction Information Accessibility Intuitiveness Branding Turnaround time Conversion etc.
		 iii. Use Dreamweaver for: Social Media Management Social Media Marketing Website Design & Web Development Pay Per Click (PPC) Management and Advert Consulting etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Concept of Computer Files	Candidates should be able to:
(a) Definitions of basic terms	i. Define some basic terms (File, record, field, data item etc.).
(b) File organisations	ii. Identify and use of basic data types (numeric, alphabetic, and alphanumeric)
(c) Methods of accessing files	iii. Explain the relationship among file structure items (Data item – field - record-file-database)
(d) File classifications(e) Criteria for classifying files	Candidates should be able to:
	 i. Classify files according to how they are organised. (Serial, Sequential, Index and random) ii. Access files as appropriate (Serial, Sequential and Random). iii. Classify files into: Master Transaction Reference iv. Explain the criteria used in classifying files Nature of content (Program and Data) Organization method Storage medium Date Size etc.
2. Handling Compu <mark>ter</mark> Files	Candidates should be able to:
(a) Basic operations(b) Data Loss	i. Perform basic file operations - Create, Delete, Retrieve, Insert, Copy, View, Update, Open, Close etc.
(c) Security(d) Computer versus manual files	 ii. Identify causes of data loss Overwriting Inadvertent deletion Hardware malfunction Virus attack Theft Arson Natural Disaster etc.
	 iii. Use different methods of securing data and maintaining its integrity Backup Antivirus

SECTION D: Managing Computer Files

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 Personal Identification Number Biometrics Passwords Proper labelling of storage devices CCTV Physical Security Fire Extinguisher Smoke Alarms etc.
	v. Compare the advantages and disadvantages of computer and manual file (security, speed of access and creation, cost of setup and maintenance, electricity supply, etc.)

SECTION E: Computer Maintenance and Safety Measures

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Booting and shutting down process	Candidates should be able to:
2.	Computer Maintenance	 i. Define booting ii. List the two types of booting process (cold and warm booting) iii. Explain the difference between cold and warm booting. iv. Explain the steps involved in booting and shutting down a computer system Candidates should be able to: Perform general cleaning of the computer system Charge and replace battery for portable systems and UPS Clean drive lens Perform simple hardware and software maintenance
		v. Recover data from a crashed system
3.	Computer Room Management	 Candidates should be able to: Define proper sitting arrangement Position the monitor, keyboard, CPU, Mouse and other peripherals appropriately Ensure Proper illumination of the computer room Maintain a dust free environment Keep liquid away from computer room Keep strictly to laboratory rules and regulations

_

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Communication Systems	Candidates should be able to:
	Candidates should be able to: i. State the full meaning of the acronym ICT ii. Define ICT iii. List types of ICT. - Broadcasting - Telecommunication - Data Network - Information Systems - Satellite Communication, etc. iv. Give examples of Broadcasting - Radio broadcasting - Radio broadcasting - Television Broadcasting - Satellites Broadcasting etc. v. List types of Telecommunications - Public Switched Telephone Network (PSTN Land Line - Mobile phone system - Circuit Switched Packet Telephone System (CSPT) - Satellite Telephone System - Fixed Wireless Telephone System etc, vi. List types of Data Network - Personal Area Network (PAN) - Local Area Network (MAN) - Wide Area Network (WAN) - Intranet - Internet etc. vii. List types of Information System - Global Positioning System (GPS), etc. Candidates should be able to: i. Define Applications Areas of ICT: - Teleconferencing - Video conferencing - Telecomputing - Messaging
	 Information search, retrieval and archival systems E-Learning Telemedicine E-Commerce E-Government E-Library, etc.

SECTION F: Information & Communication Technology (ICT)

TOPICS/CONTENTS/NOTES	OBJECTIVES
	 ii. List types of ICT Devices: Mobile phones Computers Automated Teller Machines (ATM) Dispensing Machines Point of Sale Machines Automated Cash Register (ACR) Radio sets Television sets Scanners, etc.
3. Internet	Candidates should be able to:
(a) Definition of terms	i. Define Internetii. Define and illustrate use of:
(b) Internet Browsers	Home pageBrowse
(c) Features of Internet Browsers	- Browser - Chatroom
(d) Internet Services	 Cybercafe Http Html ISP Webpage Website, etc. iii. Access the Internet through any of the browsers Internet Explorer Opera Firefox Cometbird Ubuntu Google Chrome Phoenix, etc. iv. Explain features of the Internet Browsers Title Bar Menu Bar Tool Bar Address Bar Icons Search Bar Uniform Resource Locator (URL)/Hypertext link, etc. v. Describe the use of different types of Internet services: Electronic Mail (e-mail) E-mail Discussion Group Instant Messaging/Chats Virtual meeting platforms File Transfer Protocol (FTP) World Wide Web (WWW) Search Engines Chatting etc.

	TOPICS/CONTENTS/NOTES	OBJECTIVES
4.	Electronic Mail	Candidates should be able to:
	(a) Definition	 i. Define Electronic Mail and Chatting ii. List e-mail services:
	(b) E-mail Service	 Creating e-mail address Composing e-mail
	(c) Steps involved in creating and opening mail (email box, and chatting)	 Sending/receiving e-mail Adding attachments Chatting Creating mailing list/group
	(d) Features of e-mail address	 etc. iii. Explain the features in an e-mail address e.g. xyz@jamb.org.ng (user@Domainname) Explain the components of domain name.
5.	Networking	
	(a) Definitions	Candidates should be able to:
	(b) Network types	 i. Define computer network ii. List and define various types of Networks: PAN
	(c) Network topologies	- LAN - WAN
	(d) Network devices	- MAN - Intranet - Extranet - Internet
	my	 iii. Explain the differences in basic network topologies: Star Bus Ring
		iv. Define and explain the use of network devices: - Hub - Modems - Switches
		- Routers - Gateway
		 Repeaters Access Points Interface (API) Network Interface Card (NIC), etc.
6.	World Wide Web (www)	Candidates should be able to:
	(a) Definition and full meanings of acronyms	i. Give full meanings of www, HTTP, HTTPS, HTML, XML
	(b) Brief history of WWW	ii. Explain the history behind wwwiii. Explain basic terminologies:
	(c) Basic terminologies	- www - Website - Webpage
	(d) Protocols	- Homepage - Protocol etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
(e) Advantages and disadvantages of www.	iv. Define Protocol and list different types of protocols (http, https, ftp, etc.)
 (f) Navigation through websites (g) Software for web development (h) Differences between email and website 	 v. List uses and benefits of www. Accessible from anywhere around the globe with the availability of the Internet access to information or make information accessible to the world connect to people from anywhere from home purchase products online anywhere in the comfort of your home create website for your business and do a lot much more than physical office communicate with anyone around the world through texts, chats, and emails. Online course can be completed using www. Online marketing and branding of businesses Facilitate establishing professional contacts Unlimited access to information, etc.
in the second se	 vi. List disadvantages of www Risk of data and identity theft Cyberbullying Easy spread of fake news Hacking Spam mails Paedophile, etc. - vii. Navigate through websites. www.jamb.org.ng www.neco.org.ng www.neco.org.ng www.igiyc.com www.igiyc.com www.google.com, etc. viii. Use of software for web development Frontpage WordPress Dreamweaver Photoshop Google Web Designer, etc. ix. Differentiate between email and website Xyz@jamb.gov.ng and www.jamb.org.ng
7. Cables and Connectors	Candidates should be able to:
(a) Network cables and connectors	i. Identify different network cables and connectors:

TOPICS/CONTENTS/NOTES	OBJECTIVES
(b) Computer cables and connectors	 Cables (Twisted Pair, Coaxial, Fibre Optics, etc.) Connectors (RJ45, RJ11, T-Connectors ii. Identify different types of Computer Cables and Connectors Cables: Power Cables, Data Cables, Printer Cable, Universal Serial Bus (USB), Monitor Cable, Serial Cable, Parallel Cable, etc. Connectors: Male and Female.

SECTION G: Developing Problem-Solving Skills

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Programming Language (PL)	Candidates should be able to:
	(a) Definition and Classification of PL	i. Define Programming Language (PL)ii. Identify different classifications of PL.
	(b) Advantages and disadvantages of different levels of PL	 Machine Language: interpreted directly in hardware i.e., binary machine code Assembly languages: thin wrappers over a corresponding machine language i.e., Assembly Language/symbolic language. High-Level languages: anything that are machine independent i.e., BASIC, C, Java, Fortran 2008, Python, Pearl etc. iii. Give advantages and disadvantages of Machine Language, Assembly Language and High programming Language.
2.	High Level La <mark>ngua</mark> ges (HLL)	Candidates should be able to:
	(a) Classifications of HLL	i. Classify High-Level programming Languages into:
	(b) Characteristics of HLL	ScientificGeneral Purpose
	(c) Translators	 Business Object oriented Procedural Artificial Intelligence String processing Domain Specific Scripting Systems Visual Esoteric, etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
 Algorithm and Flowcharts 	 ii. Explain the characteristics of High Level Programming Languages: Requires translation into machine language Portable Easier to read, write and maintain as commands are similar to English Use data types and data structures, selection statements and repetition/iteration constructs Use logic operators and functions that are built into the language. Programmers friendly Easy to code, debug and maintain iii. Define translators and its two basic types: Interpreters Compilers
(a) Definitions	i. Define Algorithm and Flowchartii. State functions of algorithms: They are used to
(b) Functions of Algorithm	perform: - Calculations
(c) Properties of Algorithm	- Data Processing - Automated reasoning etc.
(d) Flowchart symbols	 iii. State and explain the properties of Algorithm Input specified Output specified Definiteness Effectiveness Finiteness etc. iv. Identify Flowchart symbols Start Input/Output Process Decision Stop loop Continuation etc. v. Draw Flowchart of a given programming problem
4. Programming Language Structure	Candidates should be able to: i. Identify features/syntax of a programming
(a) Basic Statements	language - Keywords

TOPICS/CONTENTS/NOTES	OBJECTIVES
 (b) Arithmetic/string operators (c) Subunits (d) Primitive and non-primitive data 	 Variable types Constants/literals Numeric String/alphanumeric Basic characteristics of the language ii. Basic statements of a high-level programming language Input Output Processing Comments Subunits (Functions, Procedure, Methods, Subroutines etc.) Statements (Iteration/Loop, Conditional, Assignment, Dimension, etc.) iii. Arithmetic operators and expressions iv. String operators and expressions iv. String operators and expressions vi. Built in functions vi. Primitive data (Integer, float, Boolean, character, etc.) viii. Non-Primitive Data Types (Arrays, classes, string, etc.) viii. Complex data structures (Trees, graphs,
5. Program Development(a) Definition	linked lists, objects etc.) Candidates should be able to: i. Define a program
 (d) Steps involved in developing program 	 ii. List characteristics of a good program Accuracy Readability Maintainability Efficiency Generality Clarity Clarity etc. iii. State the precautions required in the development of a program Be stable, steady and patient No step skipping Follow order of execution etc. iv. Steps involved in program development Problem definition Problem definition Problem analysis Design (Flow charting/ algorithm) development Program compilation Program testing/debugging Program documentation Programme Maintenance

	 Interpreted program (BASIC, java, python) Compiled Program (COBOL, FORTRAN, C, C++, Java etc.)
System Development Life Cycle SDLC) a) Definition of SDCL b) Stages of SDLC	 Candidates should be able to: i. Define SDLC ii. Describe SDLC iii. Explain stages in SDLC Preliminary study (Identification of the problem, Recognition of the Need) Feasibility Analysis Design Implementation (coding, testing, documentation and delivery) Maintenance Review iv. Draw diagram of a SDLC
	SDLC) a) Definition of SDCL

SECTION H: Artificial Intelligence (AI) and Robotics

	TOPICS/CONTENTS/NOTES	OBJECTIVES
1.	Definition of AI	Candidates should be able to:
2. 3.	Branches of AI Applications of AI	 i. Define AI ii. Identify branches of AI - Machine Learning (supervised,
		 Internite Learning (supervised, unsupervised, reinforcement) Neural Network Expert Systems Fuzzy Logic Natural Language Processing Deep Learning etc.
		 iii. List Application Areas of AI Robotics E-Commerce Navigation Human Resource Healthcare Agriculture Gaming Automobiles Social Media Marketing, etc.

TOPICS/CONTENTS/NOTES	OBJECTIVES
4. Fundamentals of Robotics	Candidates should be able to:
(a) Definition of Robotics	i. Define Robotics
(b) Main Components of Robotics	ii. Define Robotsiii. Identify main components of Robots
(c) Types of Robots	 Control system Sensors Actuators
(d) Application Areas of Robotics	- Power Supply - End Effectors etc.
(e) Advantages and Disadvantages of Robots	 iv. Mention types of Robots Humanoid Robots Autonomous Robots Teleoperated Robots Teleoperated Robots Augmenting Robots Augmenting Robots Logistics Manufacturing Home Travel Healthcare Space exploration Entertainment Agriculture Food Preparation Manufacturing Military Customer Service etc. vi. State advantages and disadvantages of using Robots

SECTION I: Computer Ethics and Human Issues

TOPICS/CONTENTS/NOTES	OBJECTIVES
1. Ethical issues	Candidates should be able to:
a. Computer-related crime	i. Define computer-related crime.ii. State examples of computer-related crime.
b. Responsibility for computer failure	(Compromising computer systems, hacking, theft, etc.)
c. Protection of computer property, records and software	iii. List methods to prevent unauthorised use of computer system (user identification, Passwords etc.)
d. Privacy of the company, workers and customers.	iv. List methods to protect computer resources using both electronic and manual methods.

 v. List methods to Protect privacy of individual (workers, companies, customers, governmedetc.) by law and electronically. 3. Cyber risks and protection vi. Define computer security vii. Identify different types of computer security a their characteristics. Network security Internet security (cyber) Application Security Information security End user security viii. Identify appropriate security tool to use for the different types of computer security (Firewal antivirus software, encryption, etc.)
 ix. Identify categories of application threats a their characteristics (Input, authorisatic session management, parameter tampering, x. Identify basic dimensions of Informati Security (Confidentiality, Integrity, a Availability (CIA)) xi. Mention Network security Isst (unauthorised, intrusion, rules a configurations that protect confidentialit integrity and accessibility using both software and hardware.) xii. Mention Network security methods (antivit software, application security, behaviou analytics, data loss prevention, email securit firewalls, mobile device security, network segmentation, security and event management (SEIM), Virtual Private Network (VPN), W security, wireless security thre (Cybercrime, cyber-attack, cyber terroris malware, virus, trojans, spyware, Ransomwa Adware, Botnets, SQL injection, Phishin Man-in-the-middle attack, Denial of Servi Dridex, Romance scams, Emotet malware, xiv. List Cyber security safety tips Regular update of software and operati systems Use of strong passwords Do not open email attachments from the security of the construction of the software and operati systems

Potentials for Higher Studies i Computing	n Candidates should be able to:
•••••••••••••	
	i. List possible career paths in computing
	- Software Developer
	- Software Test Engineer
	- Programme Analyst
	- System Developer
	- Web Developer
	- Software Development Engineer,
	- Computer System Analyst
	- Database Administrator
	- System Administrator
	- System Engineer
	- System Analyst
	- Network Engineer
	- Business Analyst
	- Program Manager
	- IT Specialist
	- Data Analyst/Scientist
	- AI and Robotics
	- System Security Analyst
	- Digital Forensic Analyst
	- Mobile App Developer
	- ICT Manager
	- Blogger
	- E- Marketer
4	- Social Media Manager
4	- ICT Educator
(C)	- Career in Academia
	- Private Entrepreneurship
	- Internet Police
	- IT User Support/Desk Officer
	 ICT Librarian Computer Instructor, etc.
	- Computer institution, etc.
